Introduction

I'm always a computer science lover, graphic design and visul comunication. I born like classic graphic and after few years i evolved like web designer and now I'm a frontend developer. My first love was Flash with actionscript 3.0. I like write good code focusing attentions on user interface Experiencece. I'm curiosus and love learn, I work well in team, adopt the agile's motodology, give my contribution sharing my skills and asking feedback for continuing presonal improvemnt.

I'm attracted to Uber Research to the possibility of working remotely. the opportunity to increase my technical skills. and to increase my salary. So I think Uber reasearch is just for me and this jobs it fits like a glove with my backgound.

Work History

YOOX Net-A-Porter Group

From June 2015 to now
Senior Frontend Developer for Online Stores

I work in the frontend development team, using technologies such as .NET, MVC, jQuery, ES6, Sass, git, wordpress, coremedia.

I worked on the conversion, release and maintenence for the following brands: **Valentino, Red Valentino, Bottega Veneta, Dunhill, Kartell.**

I contributed to **migration and refactoring** from the previous platform based on XSLT to the new platform based on CSHTML and MVC .NET.

Training for my growth in these years was the use of **Agile methodologies** for project management, which allowed me to improve teamwork.

Using **REACT** and **REDUX** , I contributed to the development of 2 company's tools.

A **tool to support commercial team** to organize product ranking.
A **webapp to view real-time orders** of all company e-commerce.

I also contribute to internal company training as a speaker.

YOOX Group S.p.a

From June 2010 to June 2015
Senior Frontend Developer for in-season multibrand

I worked in the frontend development team, using technologies such as ASP, .NET, XSLT server-side, javascript, css, Flesh/Actionscript e Flex.

Release e maintenence: for main site and a lot of special project.

Software application: I used Adobe Flex and Actionscript 3,0, to create a tool to handler the hotspots of the products in the video streaming of the fashion shows.

Special projects referent: Special projects are little site who concern the annuals events of the fashion world, like the fashion's week of Milan. The main feature of these mini sites is that they are purely emotional. To realize them I was free to use the latest technology on the web. I followed all the step of the special projects making process, form the concept to the release.

iOS developer: I had the maintenance of some app iOS for the company's sites written in Objective-C.

ObjectWay S.p.a
From September 2009 to June 2010
