Introduction

I have always been a computer science, graphic design and visual communication lover. I have begin working as a developer since 1998. After many experiences, in 2009 I started working for yoox.com as a Senior Frontend Developer.

The most important experience within Yoox was as a part of thecorner.com team, adopting the Agile Methodologies. I have led the special projects area where I have integrated the most advanced feature for landing page.

I'm currently working in YNAP Group with the Valentino.com team, contributing to the integration with IBM technology as WCS and Coremedia in to e-commerce platform.

I share my expertise acquired overt the years by organizing speeches and internal technical courses.

I'm a curious, enthusiast and a self-taught person, always looking for some new challenges. I like new experience that can give me new skills.

Skills

JavaScript (ES6), VanillaJS, jQuery, HTML5, CSS3, Sass, ReactJs, React-Redux, Agile Methodologies, PHP, Object-C, ActionScript 3.0, Development OOP, Functional Programming, UX/UI, Wordpress, Accessibility, npm/yarn, Grunt/Gulp/Webpack, Target Process/Jira.
